

CO -- It's a Gas!!!

Is carbon monoxide a threat to you when flying? Are you sure? When was the last time you thoroughly (and properly) checked? The combustion engine in the airplane you fly creates colorless and odorless carbon monoxide (CO). This CO can inadvertently enter the cabin area and pose a serious threat while flying. Learn more about this potentially deadly and silent killer and how you can improve your chances of not having carbon monoxide poisoning happen to you.

Directions: Located south of Dallas, just West of US67 between I-35E and I-20. From US67, take S. Hampton Road northbound. Turn left (West) on to Challenger Drive. Terminal is at the end of Challenger Drive.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
